

Appl. No. 10/050,520
Amdt. dated Nov. 10, 2004
Reply to Office Action of Oct. 25, 2004

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

Claims 1-58 (canceled)

59. (currently amended): In a reminder device, the device comprising:

- a. a cylindrical container having an exterior side surface;
- b. a deformable ~~selectively-interengageable~~ engageable sheet mountable as a continuous loop member around said exterior side surface of said container, said loop member rotatable to each of a plurality of selectable positions;
- c. a deformable support ~~sheet label~~ member influencing movement of said loop member, said ~~label support~~ member defining a structural area supportably engageable with said loop member and said label member defining a plurality of selectively-interengageable structural portions adapted to selectively interengage said loop member including an aperture and said support member adapted to engage said loop member in said aperture;
- d. ~~one of said selectively-interengaged portions disallowing rotation of said loop member from a first one of said selectable positions to a second one of said selectable positions.~~

60. (currently amended): A device as in claim 59 wherein said loop member is included in a first portion and said ~~label~~ support member is included in a second portion of a common deformable sheet.

61. (currently amended): A device as in claim 59 and further ~~comprising a détente~~ including anti-displacement means for engaging said loop member with said support member to disallow displacement of said loop member from one of said selectable positions.

62. (currently amended): A device as in claim 59 and further ~~including means for attaching said label member to said container~~ 61 wherein said anti-displacement means is one chosen from a list which includes, a détente, an ant-rotation détente, an aperture, a tooth, a label sheet, a deformable member, an adherable member, a notch, an adhesive member, a tab.

63. (currently amended): A device as in claim 60 wherein ~~said loop member portion is releasable from said common sheet~~ 59 and further including co-operating indicia.

Appl. No. 10/050,520

64. (currently amended): A device as in claim ~~59~~ and further including co-operating indicia ~~63~~ wherein said co-operating indicia include an arrangement of times co-operating with a pointer adapted to point to any one of said times.
65. (currently amended): A device as in claim ~~64~~ wherein said co-operating indicia include an arrangement of times co-operating with a pointer adapted to point to any one of said times ~~59~~ and further including an adhesive.
66. (currently amended): A device as in claim ~~64~~ wherein said indicia can further be customized ~~59~~ wherein said container is a pharmacy container.
67. (currently amended): A device as in claim ~~59~~ and further including an adhesive a pharmacy label.
68. (currently amended): A device as in claim ~~67~~ wherein said adhesive is pressure sensitive. In a reminder device, the device comprising:
- a cylindrical container having an exterior side surface;
 - a deformable engageable sheet including an aperture, said sheet adapted to adhesively form a continuous loop member;
 - said continuous loop member retainable on said container and said continuous loop member movable to each of a plurality of selectable positions;
 - a deformable support sheet member influencing movement of said loop member, said support member including a tab extension, and said tab locatable in said aperture to engage said loop member.
69. (currently amended): A device as in claim ~~59~~ wherein said container is a pharmacy container ~~68~~ and further including anti-displacement means for engaging said loop member with said support member to disallow displacement of said loop member from one of said selectable positions.
70. (currently amended): A device as in claim ~~59~~ wherein said label is a pharmacy label ~~69~~ wherein said anti-displacement means is one chosen from a list which includes, a détente, an ant-rotation détente, an aperture, a tooth, a label sheet, a deformable member, an adherable member, a notch, an adhesive member, a tab.
71. (currently amended): A device as in claim ~~59~~ and further including a prescription label ~~68~~ and further including co-operating indicia.

Appl. No. 10/050,520

72. (currently amended): In a reminder device, the device comprising:
- a cylindrical container having an exterior side surface;
 - a deformable ~~selectively interengageable~~ engageable sheet, said sheet adapted to adhesively form a continuous loop member;
 - said continuous loop member retainable on said container and said continuous loop member movable to each of a plurality of selectable positions;
 - a deformable support sheet label member influencing movement of said loop member, said label support member ~~defining a structural area supportably engageable with said loop member and said label member defining a plurality of selectively interengageable structural portions adapted to selectively interengage said loop member~~ including an aperture and said support member adapted to engage said loop member in said aperture.
 - ~~one of said selectively interengaged portions disallowing movement of said continuous loop member from a first one of said selectable positions to a second one of said selectable positions.~~
73. (currently amended): A device as in claim 72 wherein said loop member is included in a first portion and said label support member is included in a second portion of a common deformable sheet.
74. (currently amended): A device as in claim 72 and further ~~comprising a détente~~ including anti-displacement means for engaging said loop member with said support member to disallow displacement of said loop member from one of said selectable positions.
75. (currently amended): A device as in claim ~~72~~ and further including means for attaching said label member to said container ~~74~~ wherein said anti-displacement means is one chosen from a list which includes, a détente, an ant-rotation détente, an aperture, a tooth, a label sheet, a deformable member, an adherable member, a notch, an adhesive member, a tab.
76. (previously presented): A device as in claim 73 wherein said loop member portion is releasable from said common sheet.
77. (previously presented): A device as in claim 72 and further including co-operating indicia.
78. (previously presented): A device as in claim 77 wherein said co-operating indicia include an arrangement of times co-operating with a pointer adapted to point to any one of said times.

Appl. No. 10/050,520

79. (previously presented): A device as in claim 77 wherein said indicia can further be customized.
80. (previously presented): A device as in claim 72 and further including an adhesive.
81. (previously presented): A device as in claim 72 wherein said container is a pharmacy container.
82. (currently amended): A device as in claim 72 wherein said ~~label~~ support member is a pharmacy prescription label.
83. (currently amended): A device as in claim 72 and further including a prescription pharmacy label.
